

## PRODUCT INFORMATION

# CVP-100

### Mechanical Vacuum Pump Fluid

**CVP-100** is a hydrocarbon fluid specially formulated with high quality base stocks and a thermally stable additive package. This fluid offers outstanding resistance to sludge and varnish formation, is chemically stable, and has good water separating characteristics. Its high viscosity index provides good lubrication at higher operating temperatures and its low pour point allows easier cold start-ups.

#### SPECIFICATIONS

Vapor Pressure	< 10 <sup>-3</sup> Torr
Viscosity @ 40° C	46 cSt
@ 100° C	6.8 cSt
Flash Point (COC)	242°C/468°F
Pour Point	-32°C/-27°F
Specific Gravity	0.87

#### APPLICATIONS:

Rotary vane type pumps that are exposed to high operating temperatures or pumping large volumes of air.

The information and data contained herein are believed to be accurate and reliable; however, it is the responsibility of the user to determine suitability of use.
